

June 2009

Members

Turkish Society of Anatomy & Clinical Anatomy

We are writing to invite the members of the Turkish Society of Anatomy & Clinical Anatomy to the 27th Annual Meeting of the American Association of Clinical Anatomists (AACA) which will be held at the Hilton Hawaiian Village Hotel in Honolulu, Hawaii, July 19-24, 2010, jointly with the International Society for Plastination (ISP), which is convening their 15th International Conference. The meeting will be followed by a one-day post-graduate course in plastination presented by the ISP and hosted by the University of Hawaii School of Medicine. This course will be an intensive hands-on laboratory experience with the objective of providing sufficient information so that participants could establish a plastination laboratory at their home institution. Our invitation comes to you and your Association as part of our hope this will be truly an international gathering of anatomists of all nationalities. The Hawaiian Islands with their tropical beauty, offer a wonderful venue for this joint meeting, and will provide attendees a truly unique professional experience.

Plastination is one of the techniques that increasing numbers of anatomy programs, both human and veterinary, are utilizing in teaching and research. We are particularly delighted that the IPS will be meeting concurrently with the AACA, thus facilitating simultaneous attendance at two anatomy-based meetings for participants.

We wish to alert you now to this upcoming meeting. Further details concerning this meeting will be found on the AACA website: <http://www.clinicalanatomy.org> The website for this meeting will be continually updated during the coming months, as planning progresses. We hope that you will post this letter of invitation on your associations website, so that many of your members who wish to attend can begin making their travel plans.

We look forward to seeing as many of the Turkish Society of Anatomy & Clinical Anatomy as possible.

Lawrence M. Ross, M.D., Ph.D.
President
American Association of
Clinical Anatomists

Carlos Baptista, M.D., Ph.D.
President
International Society for
Plastination
