Welcome to anatomist 2009

Where (Your) Dreams and Science Meets

Istanbul; the Alluring, Extraordinary, Proud and Mystical City...

Istanbul, the only city in the world built on two continents. With its spectacular location Istanbul guards the precious monuments of three empires, of which she has been the capital; a unique link between East and West, past and present. A place brimming with history, Istanbul has modern European infrastructure laced with great palaces, mosques, ancient churches, bazaars and museums.
